

# Exensys Software Solutions Limited

*A product development company specializing in ERP solutions.*

**The product:** Exensys has developed eXensys, an Extended Enterprise System, which helps organizations align their processes with strategic goals, increase bottom line profits and enhance productivity, flexibility and customer responsiveness. eXensys gives an organization, a 360 degree view of data to help people in making faster and better decisions to compete effectively in the marketplace

**The innovation:** eXensys is an innovative approach and a viable solution for companies that are looking to automate their business process quickly and scale with their growth. The product is completely Web-based, offering customers in-built integration capabilities through SOA, EDI, the Publish-Subscribe Messaging Framework, Web Services and EAI Technologies at the architectural level.

## Product highlights

- Exensys Enterprise Application has featured in Microsoft's "India is innovation 2006" short listing
- eXensys is now a robust suite of over 20 integrated applications built on n-Tier Service-Oriented Architecture (SOA) and the Microsoft .Net framework
- The eXensys suite comfortably fits about 32 industries spanning Manufacturing (Process and Discrete), Retail, Trading and Services verticals.
- The extended and expanded applications of the eXensys suite facilitate easy customization, bringing down the implementation time and cost to a bare minimum.
