Introduction:

Employment life cycle is the frame work used to discuss HCM activities. Everything in the life has a process, right from interview to starting a job, till quitting or retiring. If we properly streamline the process by analyzing the best practices, it will not only add value to the business but also reduces human efforts and increases efficiency. This is possible only when the activities, work plans and processes are identified, defined and deployed in a structured way. Human resource administrators are finding that, as software modules are installed to automate various processes, they have more time to focus on strategic objectives. Streamlined employment life cycle process facilitates organization to focus on core activities and leave the process to run smoothly on the defined configured elements to achieve organizational complacency. HR staffers are finding that the automated system can deliver and track the data with an accuracy which does not match with paper-based processes. In this situation eXensys HCM helps the customers in a best way than any others.

Overview:

The employment life cycle consists of various stages which are broadly categorized as follows:

- Workforce Planning
- Hire Workforce
- Workforce Maintenance
- Workforce separation

Workforce Planning

Workforce planning involves analyzing and forecasting the talent that the companies need to execute for their business strategy. It is a strategic activity which is being used increasingly to help control labor costs, assess talent needs, make informed business decisions and assess talent market risks as a part of overall enterprise risk management. Strategic workforce planning is aimed in helping companies make sure that they hire the right people in the right place at right time and at the right price.

Hire Workforce

The stages in recruitment include sourcing candidates by advertising or other methods, screening and selecting potential candidates using tests or interviews.

eXensys recruitment module is a perfect suite for hiring the workforce in an organization which is designed to cater the requirement of all types of organization. It covers all hiring requirement in micro level to meet the requirement of the client. eXensys HCM gives a proper process flow between all modules which is designed to streamline the employment life cycle.
